

While your cloud service provider (CSP) is responsible for your cloud infrastructure's security, you still have to ensure the security of your applications, data, and network. Bespin Global's Cloud Security services enable you to enhance your security posture by:

Assessing, mitigating, and managing your security risk

Simplifying, centralizing, and automating your cloud security services

Increasing visibility to detect and respond to threats quickly and confidently

Our broad portfolio of cloud consulting and managed security services allows us to deliver an integrated approach for identifying threats and implementing security strategies based on your organization's specific needs.

**CONTACT BESPIN'S CLOUD SECURITY EXPERTS**

## **WHY CHOOSE BESPIN GLOBAL FOR CLOUD SECURITY?**

### **GLOBAL ADVISORY**

Our global advisory and advanced technologies help us quickly identify and thwart cybersecurity threats

### **INTEGRATED APPROACH**

Deep cloud expertise enables you to address complex issues and mitigate risk with an integrated approach

## **MANAGED SECURITY SERVICES**

We protect your business with value-driven threat intelligence, monitoring, and management

Leveraging deep insights into critical security strategies such as zero-trust, we'll help you understand and quantify your risks and detect and respond to threats. Our experts are available to complement your team resources and accelerate the adoption of a unified security posture enabling business transformation.
